

Chinese miner reveals plans

CHINESE miner China Yunnan Copper Australia Limited has announced its five year strategy, including plans for mining in the Ravenswood/Pentland province.

The company's long-term vision is to own profitable copper gold operations in Australia and overseas.

Sampling and geophysical programs at Pentland by China Yunnan Copper Australia Limited (CYU), targeting Mt Leyshon style porphyry gold deposits are starting soon.

In January the company reported plans for further drilling at Pentland to generate sufficient understanding of the mineralisation of

a maiden gold resource estimate during this year.

The Toomba prospect is considered to have many features correlating to the proposed models of Mt Leyshon, Kidston or Ravenswood-style mineralisation.

The area under investigation is positioned to the east of the traditional Lolworth diggings and north of Homestead.

Previously reported surface rock-chip/grab samples collected by CYU returned peak values of 44g/t gold, 128g/t silver, .65 per cent copper, 3.41 per cent lead and 4.8 per cent zinc.
