Exploration team with operational discovery expertise

Australian company China Yunnan Copper Australia (CYU) explores for and develops minerals in Australia and overseas.

Led by an experienced exploration team with proven discovery record in Australia, PNG, Greece, Slovakia, Mexico and Chile, CYU is targeting high quality copper, gold and uranium. The company has 11 exploration permits in the Mt Isa Inlier, Ravenswood-Pentland Province and the Clermont Inlier in Queensland.

CYU recently announced encouraging drill results at the Gem Prospect on its Cloncurry North Project.

A cornerstone CYU investor is Yunnan Copper Industry (Group), one of China's largest copper producers.
